

Sherpa

Load it in complete safety

ThyssenKrupp Elevator France

ThyssenKrupp

For delicate vertical conveyance, The Equi-Lift solution

Laboratories ?... Restaurants ?... Chemical plants ?...
The 50, 100 and 300 kg models provide all the Equi-Lift
solution advantages enabling smooth and precise vertical
conveyance.

Between two concepts Tradi-Lift and Vari-Lift, the Sherpa Equi-Lift
solution combines all their qualities and advantages.
With its frequency variation system, traction drive and
counterbalanced, Sherpa Equi-Lift ensures smooth vertical movement
at variable regulated speed.

Sherpa

A range of solutions
designed with your business in mind

Hotels, Restaurants, Laboratories, Plants, Warehouses, Head offices, Local Government departments... At your service.

Heavy equipment?... Fragile ware?... Special loads?...

ThyssenKrupp Elevator's Sherpa range offers you specific solutions for the conveyance of your products in complete safety.

A special Sherpa for every type of business

Appropriate to your particular needs, Sherpa is adaptable for restaurant service lifts, goods lifts, trolley lifts or document lifts by meeting your load, cubic capacity, layout or access requirements. Their toughness, flexible performance, range of accessories and options and their wide capacity range from 40 to 300 kg makes the Sherpa a "world bearer". ThyssenKrupp Elevator has also fitted them with technological features making them smart, reliable and faithful bearers, similar to their namesakes

Easy to erect, easy to modify

The Sherpa is made up of a self-bearing frame carrying all the components (machine, controller, guide rails, shaft items). With its mechanical parts of a modular structure and factory installed and tested wiring, initial works and installation time are considerably reduced. Claddings ⁽¹⁾ can be fitted later, according to your site design requirements. Quick installation is ensured and this includes its capacity for later modification – your Sherpa makes it really simple: the addition of a level, a change of type of service or cladding... Your Sherpa is a lift made by ThyssenKrupp Elevator. As such, it complies with goods lifts regulations and the European directives 89/336/CEE and 98/37 Machine, and is also entitled to bear EU markings. You can take on all your loads, even the most delicate.

⁽¹⁾ ancillary works do not generally include ThyssenKrupp Elevator products

Tough equipment

For conventional loads

Types of doors and cars

Appropriate to the requirements of your business

The Sherpa range offers you a wide range of hard-wearing materials. The smooth-acting be-parting door is made up of two vertically opening/closing door panels. The swing door, recommended for mobile loads, is generally located at floor level and has a side-hanging door panel.

The car is made of sheet steel. This equipment can be made of stainless steel or in plasticized, lacquered or oven-baked primer-coated sheet metal.

Controller: touch, sight and sound

The call and send control is very efficient and easy to use. The car is controlled from the operating panel integrated in the landing architrave. The car's position and availability is displayed by light indicators and sound signals and the

control manages all calls, safety circuits and possible options.

The Sherpa's robustness and easy handling ensures enhanced competitiveness.

Vari-Lift solution

No more surprises, abrupt movements or overturning! With its frequency variation system and drum winding, Sherpa Vari-Lift ensures vertical movement at variable regulated speed enabling high precision, non-shock halting. ...With the Vari-Lift solution, your Sherpa works for you, calmly and gently.

Customized equipment at your service

3 goods lift concepts					
Characteristics	Tradi-Lift		Equi-Lift		Vari-Lift
Drive	Traction drive, counterbalanced		Traction drive, counterbalanced		Drum winding (maxi race 8 m)
Load in kg	50 - 100	300	50 - 100	300	40 - 80 - 180
Speed in m/s	0.45	0.30	0.45	0.30	0.30
Speed characteristics	Single speed		Variable speed		Variable speed
Dimensions of car	500 x 500 x 800 - 600 x 600 x 800 800 x 800 x 800 - 1000 x 1000 x 1200				
Clear opening	According to the car height and width				
Type of doors	Bi-parting door - Access at floor level or above ⁽²⁾ Swing door - Access at floor level or above ⁽²⁾				
Goods lift with non-standard characteristics on request, subject to compliance with current regulation					
Power voltage	Three-phase 400 V		Three-phase 400 V Single phase 230 V		Single phase 230 V
Standard finishes	Primer-coated sheet metal or 304 ⁽³⁾ stainless steel 220 stain finish				

⁽²⁾ Requires a pit - ⁽³⁾ Stainless steel used in a non-aggressive food environment

3 concepts, and + 100 versions...

Ensured modularity means a guaranteed service. The Sherpa range easily lends itself to a wide range of preferences and professional requirements. Are your loads conventional or are they more delicate? Well, you can choose between three technological concepts: Sherpa Tradi-Lift, Sherpa Equi-Lift and Sherpa Vari-Lift. Are your constraints or your locations many and varied? Your Sherpa can be installed to suit front only, through car or adjacent entry. The Sherpa range includes more than 100 different versions. Have a look at them and get our consultants to recommend the Sherpa that fits your business needs precisely.

...not counting accessories and options!

Roller shutter in aluminium.
Car door.
Goods lift shelf(s), one or more, fixed or removable.
Car heating.
Arrival signals, on all doors if required.
Car lighting.
Communication, between floors by intercom.

... All this, and more... on request and subject to current regulations.

Sherpa is a ThyssenKrupp Elevator range of goods lifts which offers the solution.
